

Do you have a growth on your skin that is concerning you?

We are seeking patients who are concerned about an abnormal skin growth or whose physician feels they may have a lesion suggestive of skin cancer.

is participating in a clinical study evaluating a new investigational device that uses light technology designed to help clinicians assess skin growths that may be suggestive of skin cancer.

Qualifying patients will be seen and evaluated by a study investigator and offered a total body skin exam to scan for and evaluate suspicious moles.

To participate you must:

- Be at least 22 years old
- Have at least one abnormal skin growth
